Target Temperature Water on Demand

I want to develop a water faucet that will deliver just the right amount of water at a specific temperature as programmed by the user. It will use a temperature controller and flowmeter that can be set by the user. The benefit of this idea is reducing energy and water usage by preheating the exact amount of water to the necessary temperature. No more running the faucet for a long time to obtain the desired temperature!

Heated steering wheel

Many cars have heated seats which comes in handy on cold days. However these do little to heat the hands which are some of the most cold sensitive body parts and they are also essential to driving. Therefore I thought of a heated steering wheel which would keep hands warm and comfortable without bulky gloves.

Beadnik

Our big idea is a business called Beadnik! Beadnik offers both a product and a service. The product is do-it yourself beading kits that will be sold in local gift shops, as well as, directly from us through our website. One kit will include all the supplies needed to make a beautiful piece of jewelry! The second part of our business is a service, which is beading classes. These classes will teach the basics of beading in a short amount of time. They will be hosted in local hospitals to make the wait or stay more enjoyable and the atmosphere more pleasant. Remember, it's all about beads!

The Blue Bird Box

My name is Devon T. Price, I am 16 and I attend Fairport, NY Start Program. I have Aspergers Syndrome.

My idea is the Blue Bird Box (BBB)! In 2008 which is coming really quick, they're changing all TV stations to broadcast digital signals. Free TV as we know it will no longer exist. This cannot be allowed to happen.

My invention is a simple converter box that's only job is to change the digital signals to analog at a low price keeping TV in reach for everyone.

In 2002, the FCC (Federal Communications Commission) created the rules for digital TV broadcast. All TV's by January 1st, 2008 have to be digital or they won't receive a picture. So everyone will have to buy a relatively expensive digital TV or services from the cable or satellite company. This is leaving out real public access for all people to watch TV or act as an emergency source when absolutely needed. This has been the reason for TV since its invention; entertainment and access for all.

My idea is the Blue Bird Box (BBB)! My invention is a simple converter box that's only job is to change the digital signals to analog at a low price (like rabbit ears) keeping TV in reach for everyone. It shouldn't matter who you are where you live or what you have in money to watch Sesame Street, Masterpiece Theater or Deal or No Deal. It's just a small box for everyone. Thank you for listening!

TeenWorkConnections

Greater Rochester and Upstate New York

TeenWorkConnections is an online job site where teens can search through jobs, get interview tips, build a resume, ask teens and employers questions, and much more. Businesses will be able to post jobs for about \$25. Businesses will be able to see teens interested in their jobs and answer any questions the teen may have. Businesses will also have access to laws regarding the employment of minors. At TeenWorkConnections we hope to make the job search process fun and simple for all teens.

TeenWorkConnections is a locally owned and operated business that sells job listing services to businesses in the Greater Rochester Area. Unlike our competitors our service is primarily aimed to the teen labor force. Realizing that teens have unique needs we understand that there should be a job site primarily for them. Teens do not have traditional resumes; teens lack experience and references. On our site most of the jobs teens find will be their first job, therefore they lack knowledge about having a job. Our site will provide students with resources regarding, the hours they can work, interview tips, as well as how to act in the workplace and explanations of the deductions on their paycheck. We will implement a forum that students can use to share job tips and ask questions. We understand that parents would like to be involved in the job process therefore we will have a section dedicated to parents where they too can ask questions and gather information to help their teen.

Global "Salvation Army"

Americans need to feel good about helping people of the world. This is how the Foundation will work:

- 1) Tax shelter and tax benefits for the donors
- 2) Solicit funds from corporations, philanthropic charities and other sources.
- 3) Channel these funds to Post Offices all over the nation using a population based quota system
- 4) Provide Post Offices with software that monitors the consumption of funds
- 5) Provide support consumer information support via telephone and via website
- 6) Negotiate custom regulations with two countries to allow charities in their countries to receive these goods.

Monetary donations from Americans to poor countries exceed \$100 Billion, but the validity of proper and effective use of these always plagues the minds of the donors. Americans need to feel good about helping people of the world.

Have you wondered about being able to donate your old clothes to poor people overseas? Are you stumped in your efforts by the custom requirements in various countries and by the exorbitant freight charges? Hopefully, with our Foundation's efforts you will be able to donate your clothes overseas via free freight, with no custom obligations and with tax benefits!

Donors will simply take their discards to the nearest Post Office, pick out the charity from the list, show the goods to the Postal Official, receive tax benefits receipt and leave!

We seek help in the following areas: Advisors, Finance, Investors, Legal and Management Advice, and Communications.

Greater Rochester and Upstate New York

Ultimately the Americans will help poor people of the world in kind, using not just cash!

Cough-Gum

STOP LOOKING YOU'VE FOUND THE IDEA! I have an idea that could change the sore throat buisness. I have an idea of creating a cough drop with gum inside, which has cough medicine in it for lasting effect. Because a cough drop desovles in a matter of minutes as does its effect. But cough gum's effect would last hours while you chew the gum.
